(54) Title: METHOD, SYSTEM, PLAYBACK DEVICE AND RECORDER FOR DUPLICATING MULTI LAYER RECORD  
CARRIERS

(57) Abstract: When a multi layer record carrier comprising video information is to be duplicated on another multi layer record  
carrier the data spread over two recording layers on the source record carrier must also be spread over the layers of the target record  
carrier. In order to avoid the processing of the video data to find an appropriate layer transition point the playback device provides  
the logical address of the layer transition point of the source record carrier to the recorder and the recorder uses this logical address  
to implement the layer transition on the target record carrier.
